SEPTEMBER 8th, 3355

-Things as usual in the institute.

-Rain washing down my window, it always rains on Slexeter.

-Bobby fell asleep on my paperwork again.

-Lots of good research data uploaded to HyperNet today.

-Meeting scheduled today with Drake Jackson, unhappy with his assignment.

-His feedback could prove valuable.

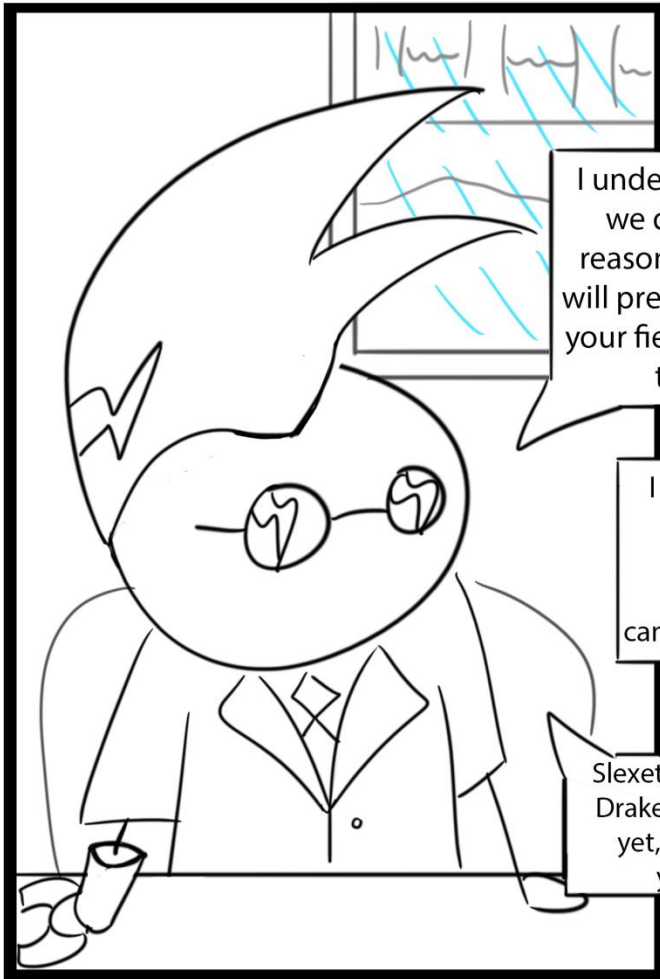

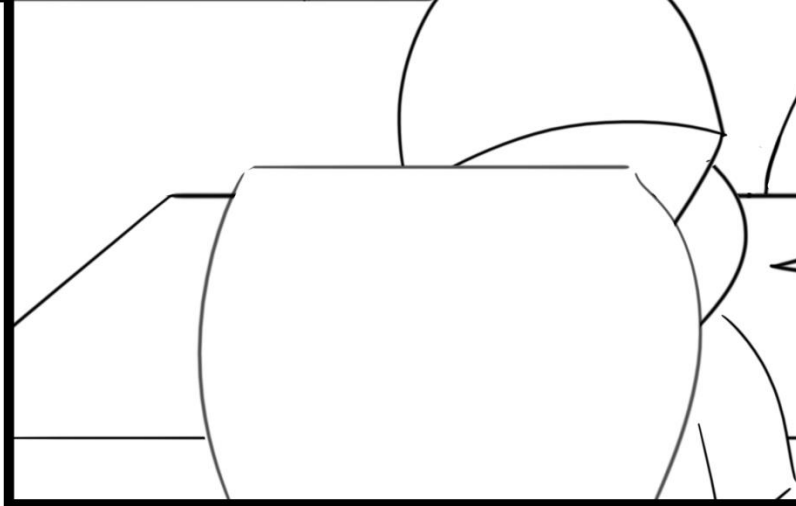

Hi...I've uh...got a meeting scheduled with Dr. Shox.

So, you're unhappy with your assignment, Drake?

Somewhat...it's all this reading and doing paperwork. There's more to science than documentation...

I understand, but we do it for a reason. Studying will prepare you for your field work out there.

I don't need to prepare though...on Planet Destinia I did hang gliding and survival camping for fun...I'm ready.

Slexeter is different from Destinia, Drake...we haven't researched it all yet, but there's known dangers you could come across...

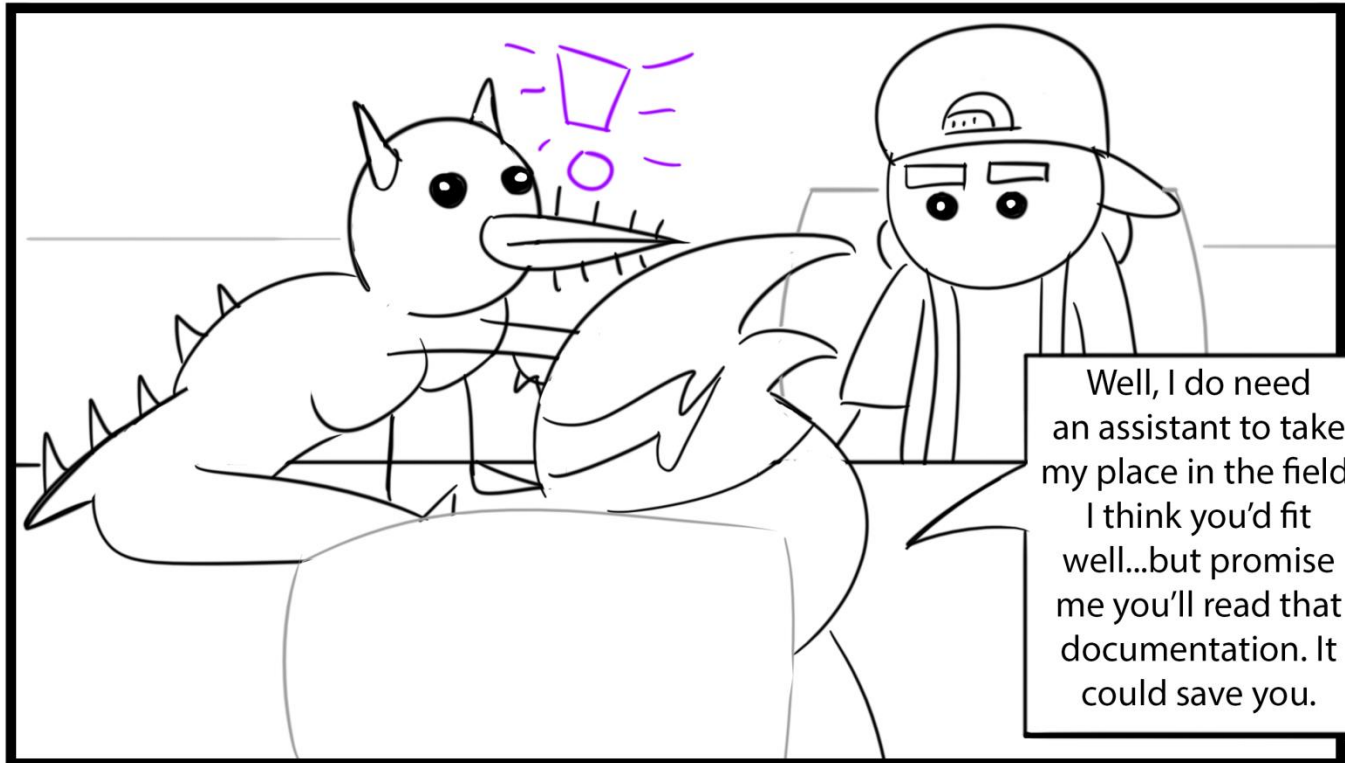

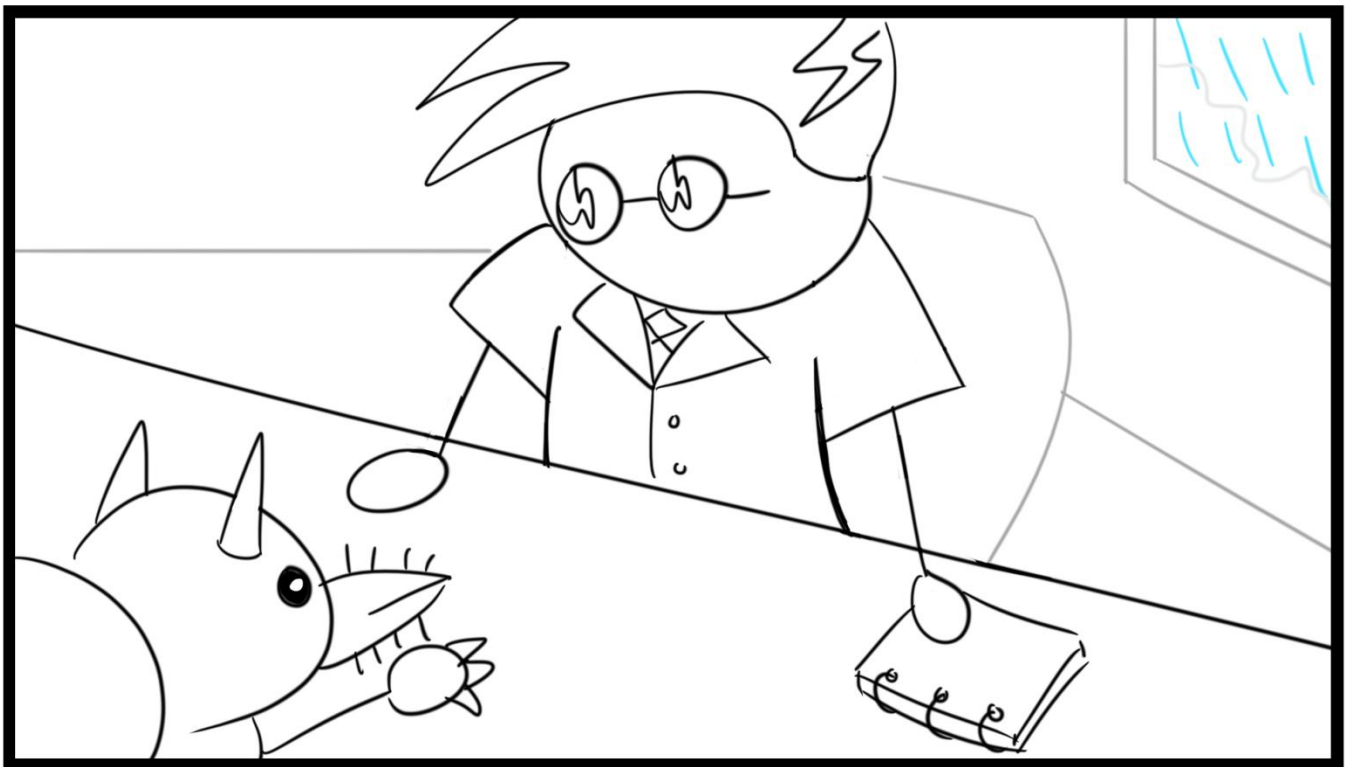

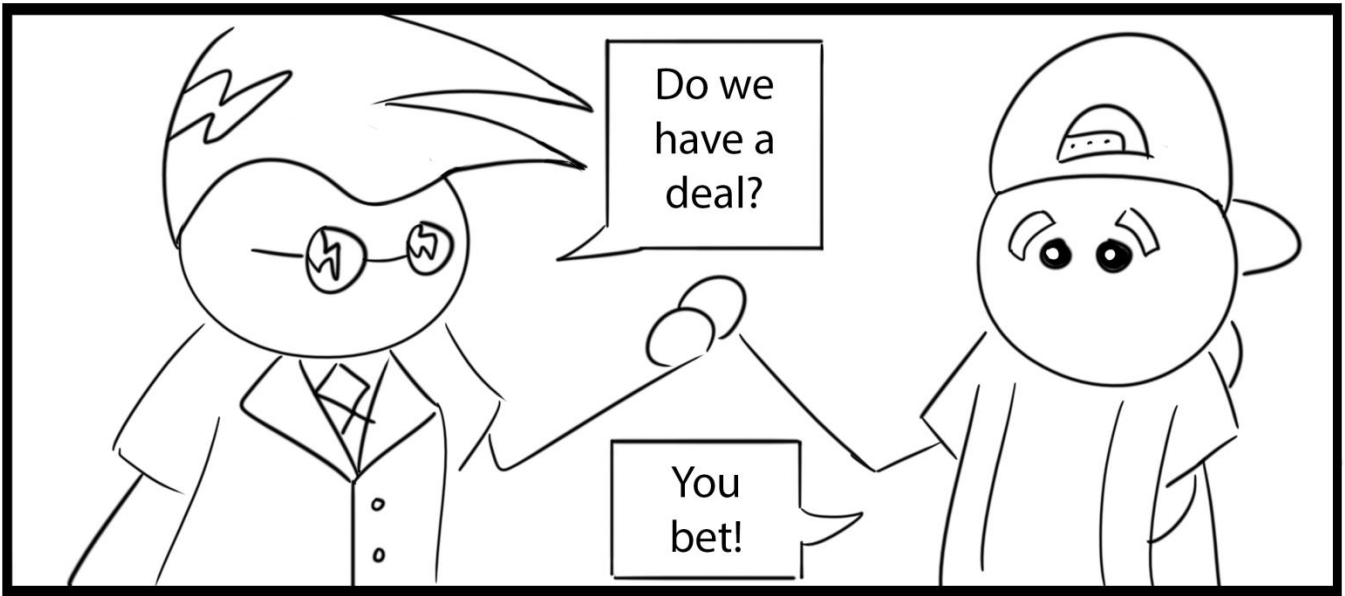

I get it, Dr. Shox...but I became a scientist to be hands on out there on the field...my passion lies there.

I **can** handle myself out there...honest... just give me a chance to prove it...

Well, I do need an assistant to take my place in the field, I think you'd fit well...but promise me you'll read that documentation. It could save you.

SEPTEMBER 8th, 3355(cont.)

-Finished meeting with Drake,
passionate about field work.

-Made an agreement, he works in field,
he finishes his required reading.

-He'll be my new assistant, out there in
place of me.

-Exciting opportunity for Drake, and
potentially even the institute.

-Might take Bobby for a walk, looks
anxious to go outside.

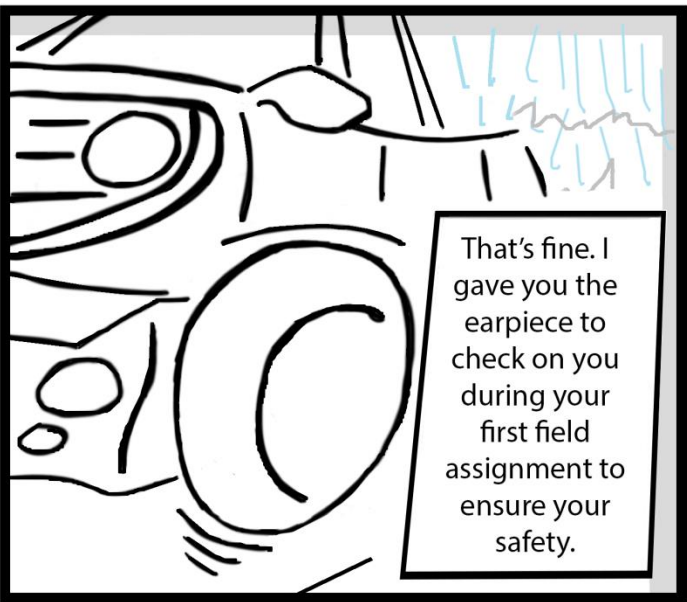

-Zervulfs like Bobby sure are energetic.

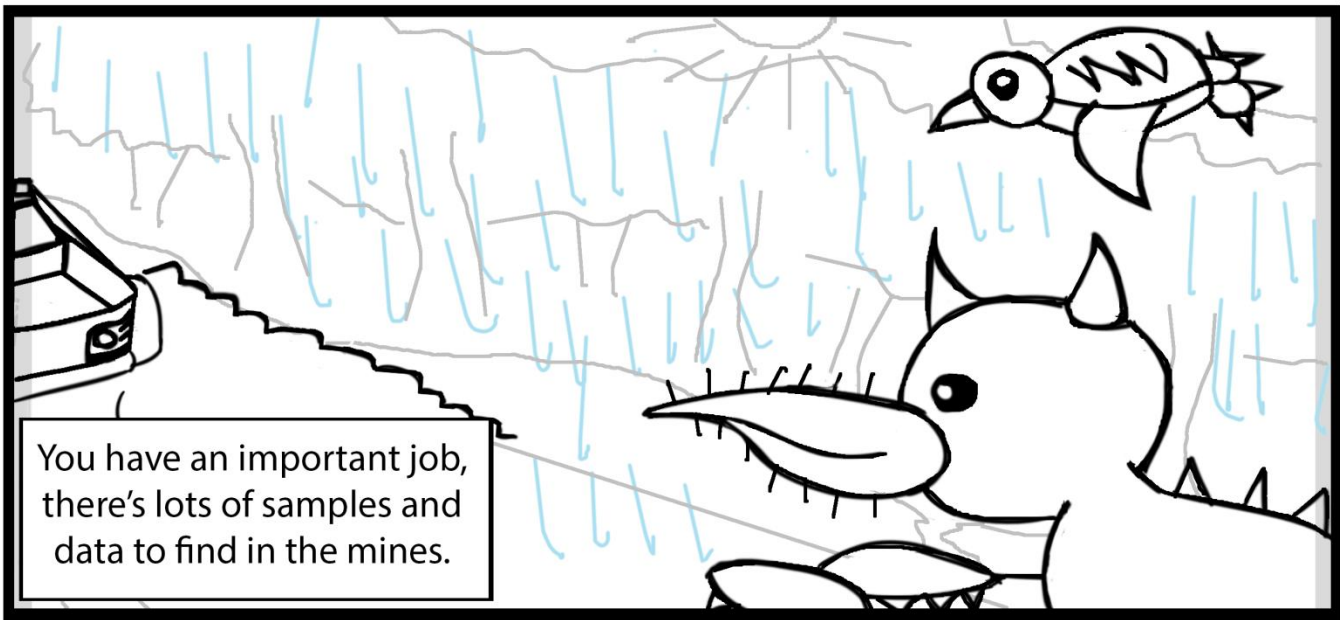

A few weeks later...

OH! You startled me, I forgot I had this.

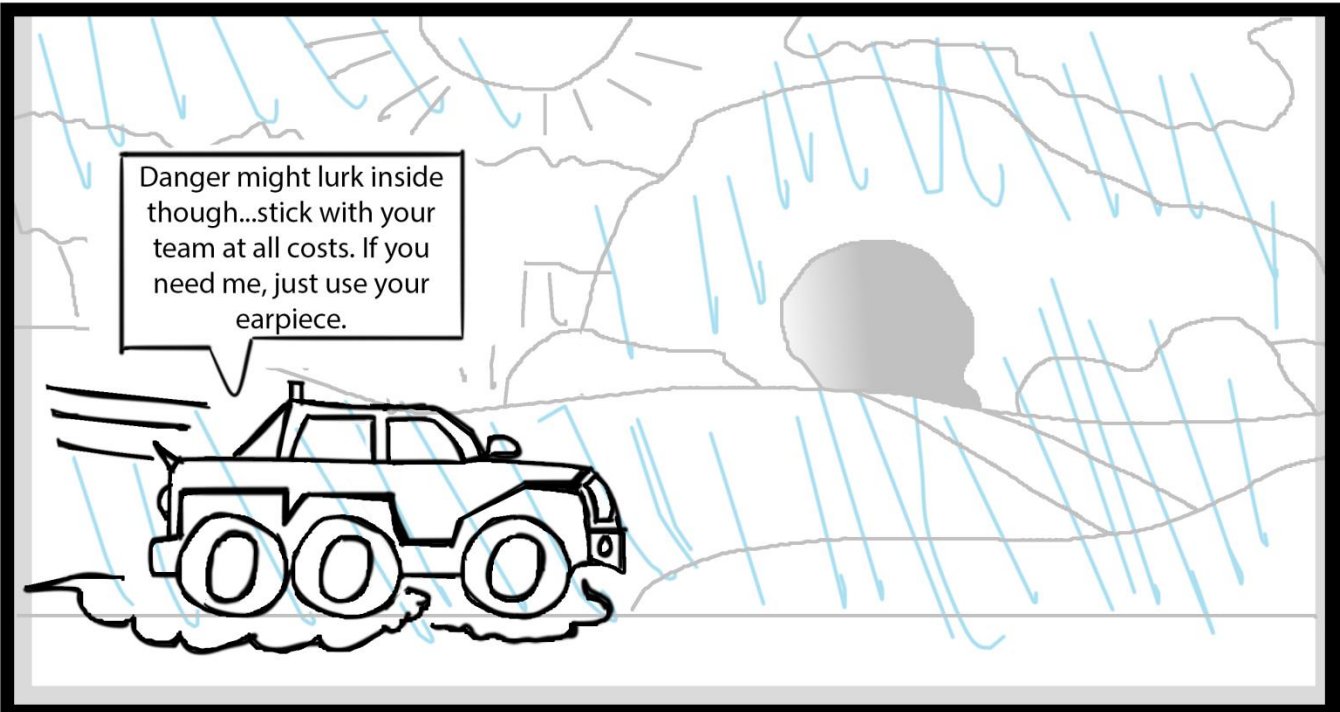

Drake, are you there?

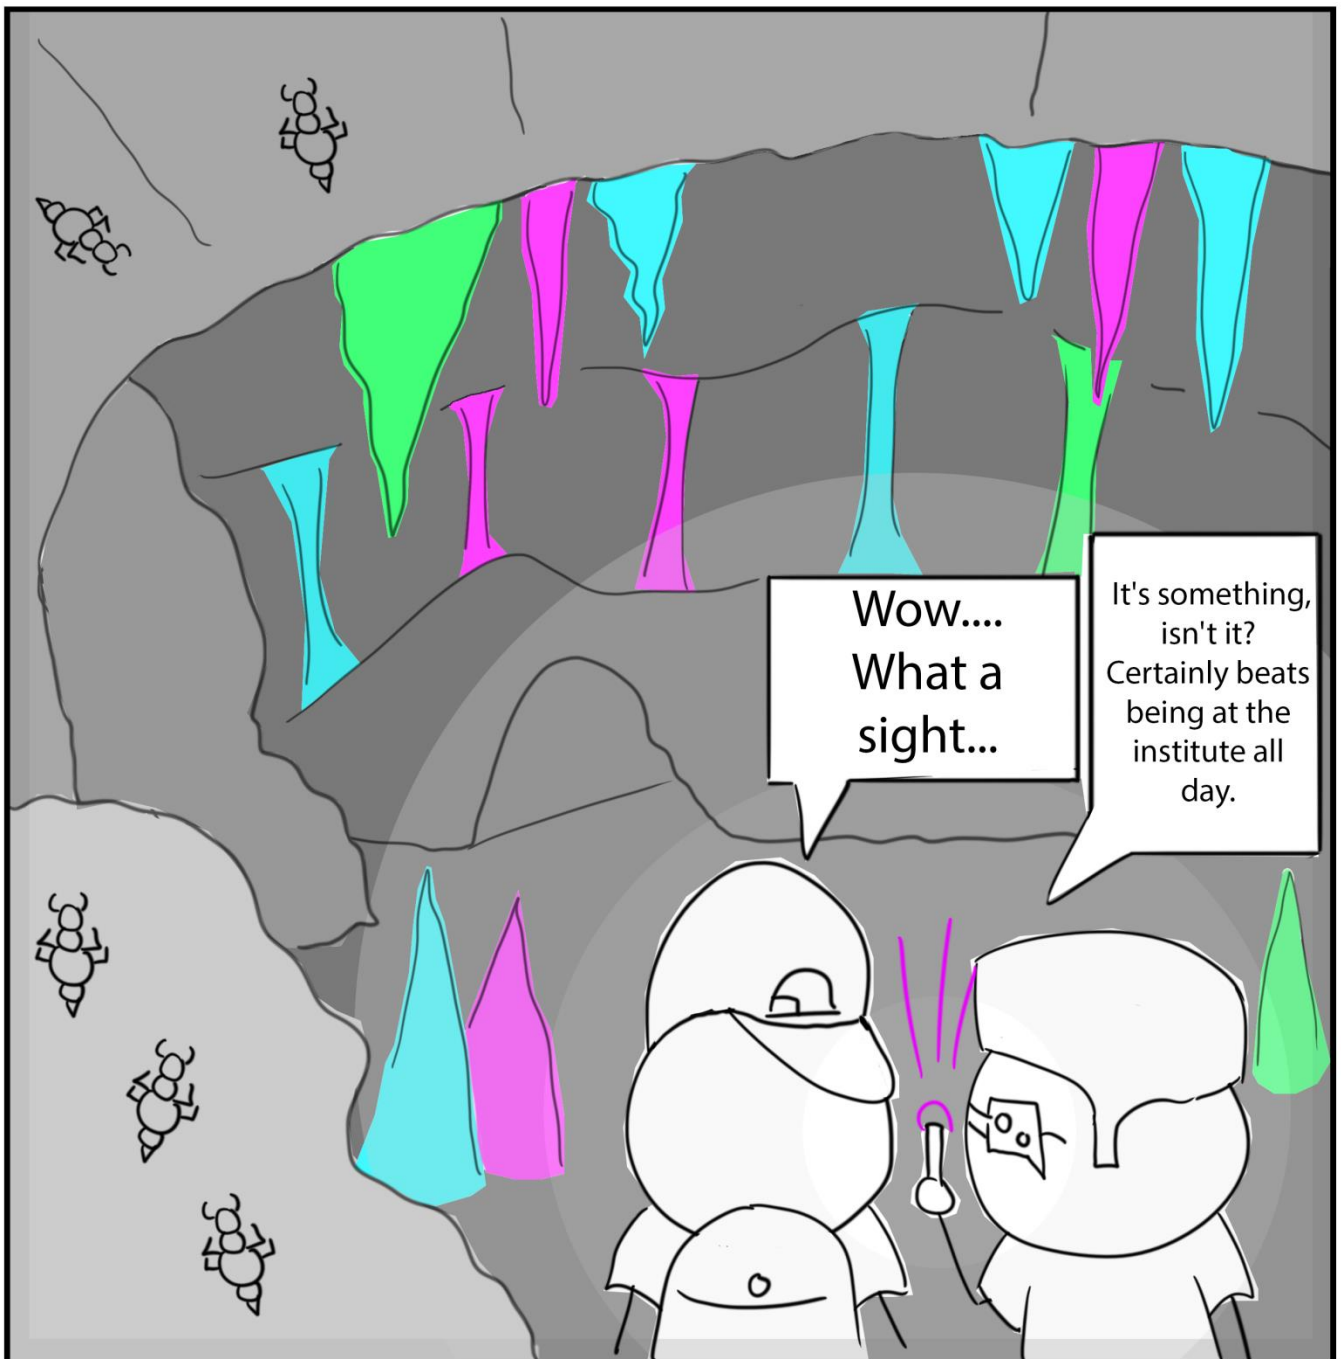

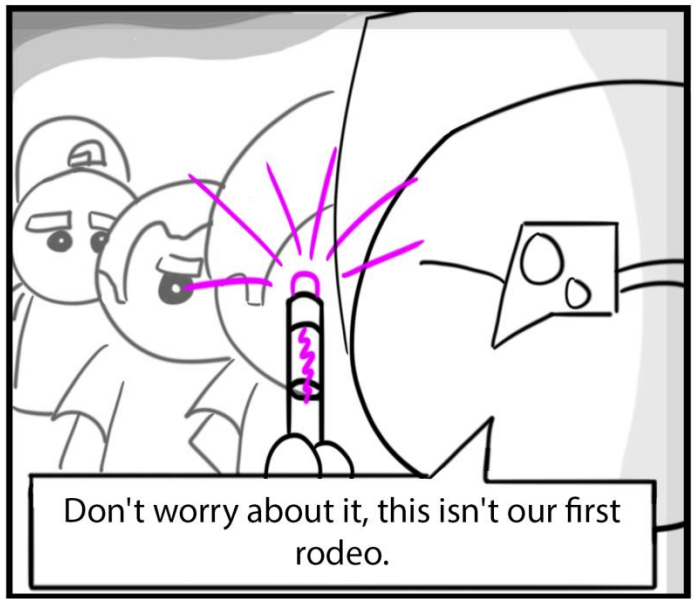

That's fine. I gave you the earpiece to check on you during your first field assignment to ensure your safety.

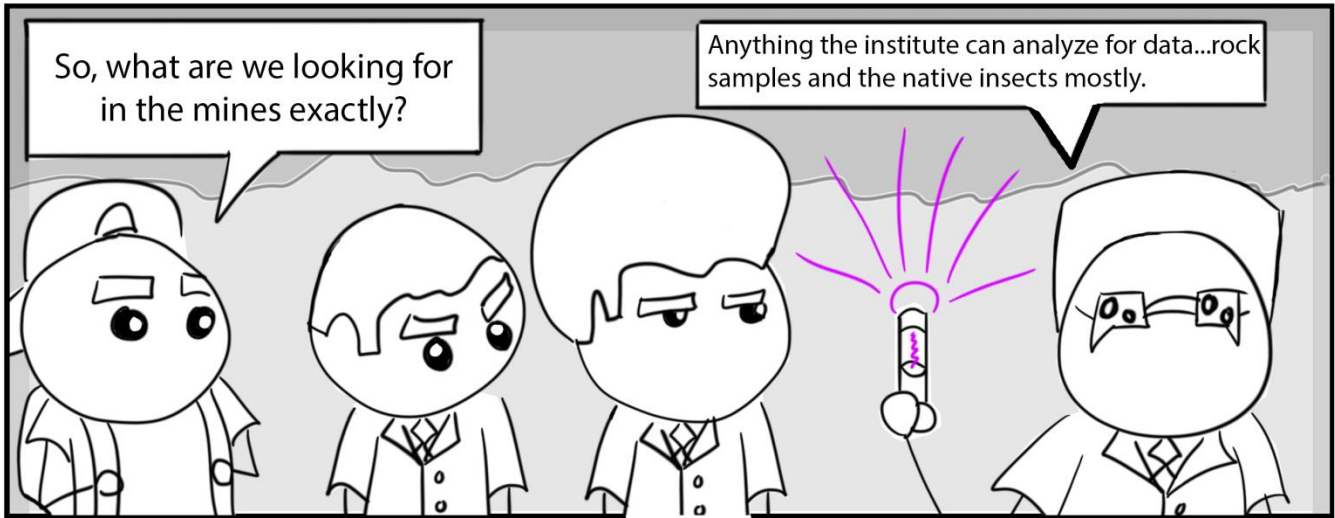

You have an important job, there's lots of samples and data to find in the mines.

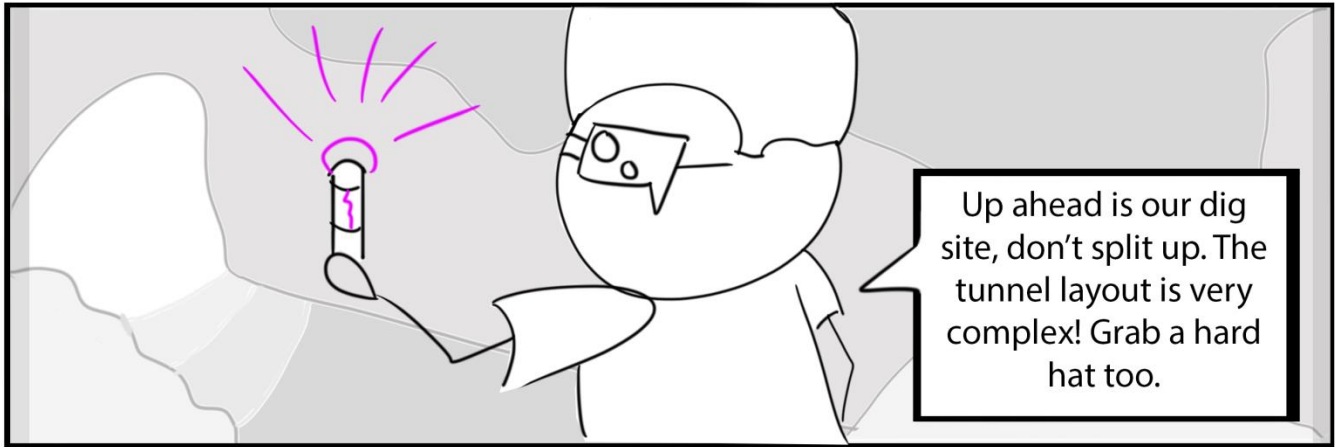

Danger might lurk inside though...stick with your team at all costs. If you need me, just use your earpiece.

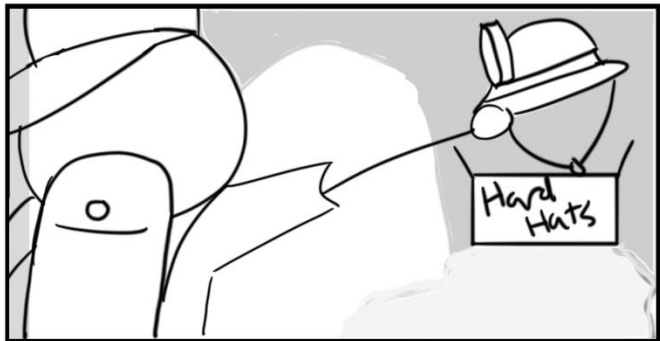

So, what are we looking for in the mines exactly?

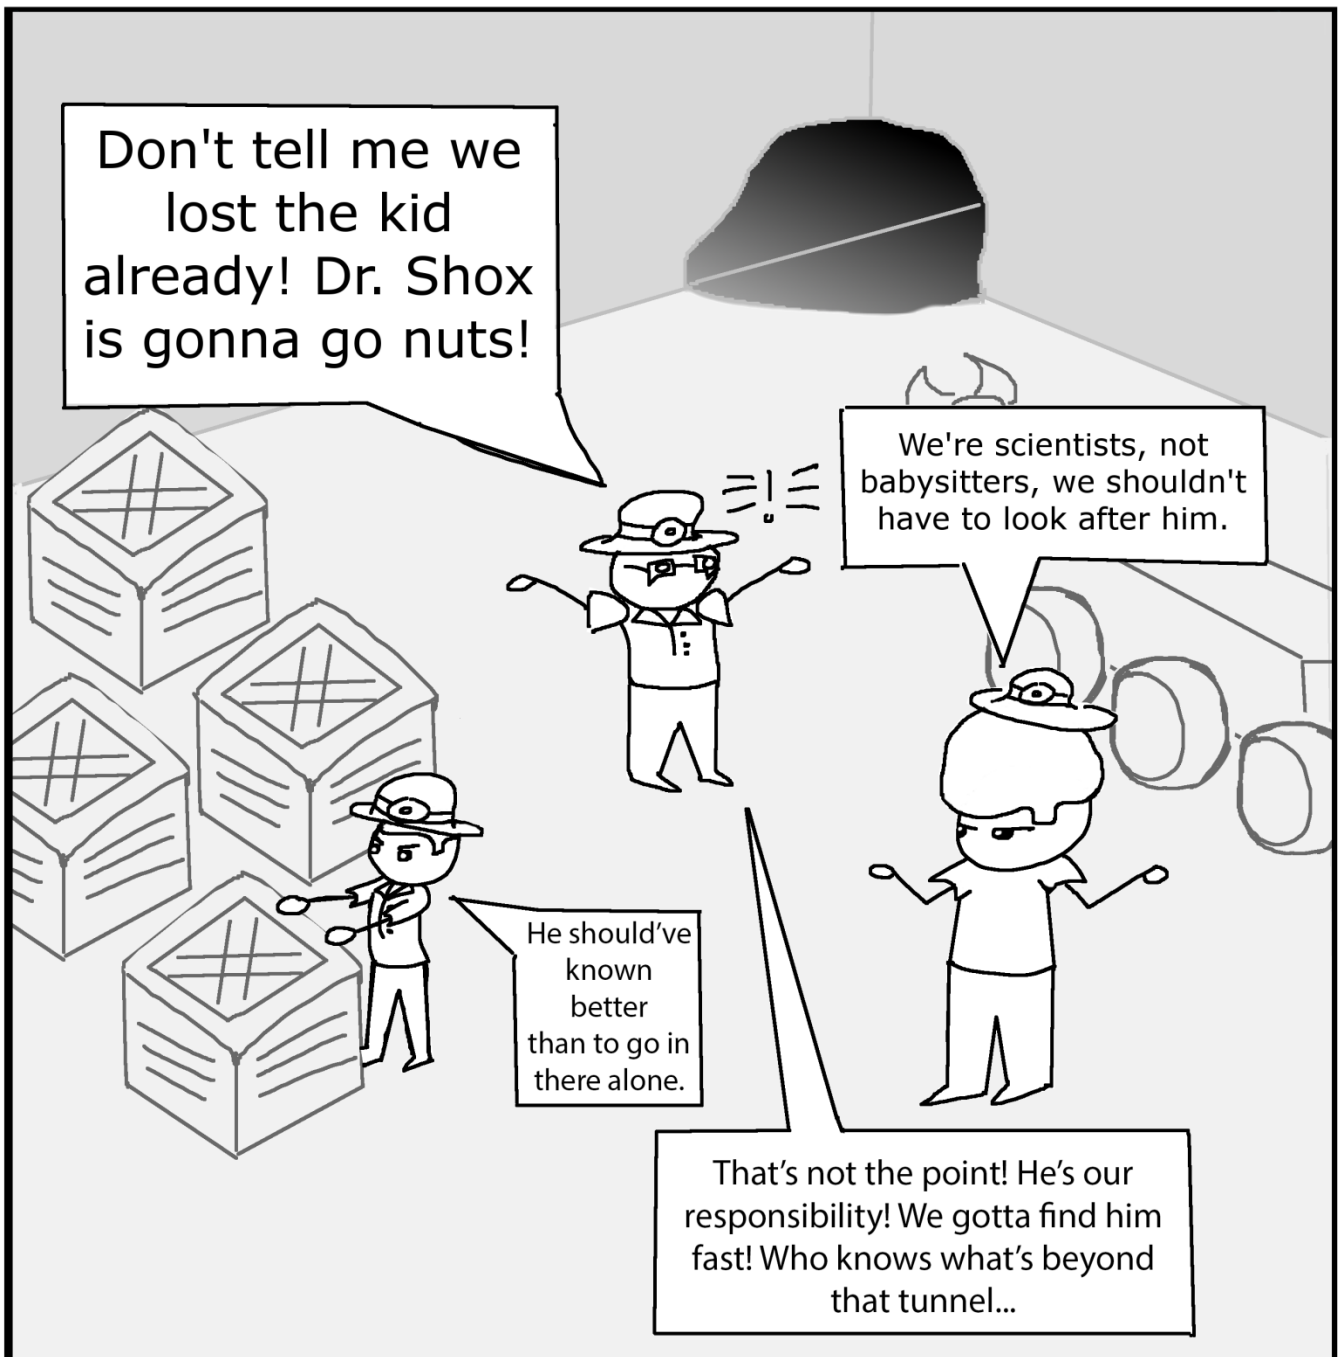

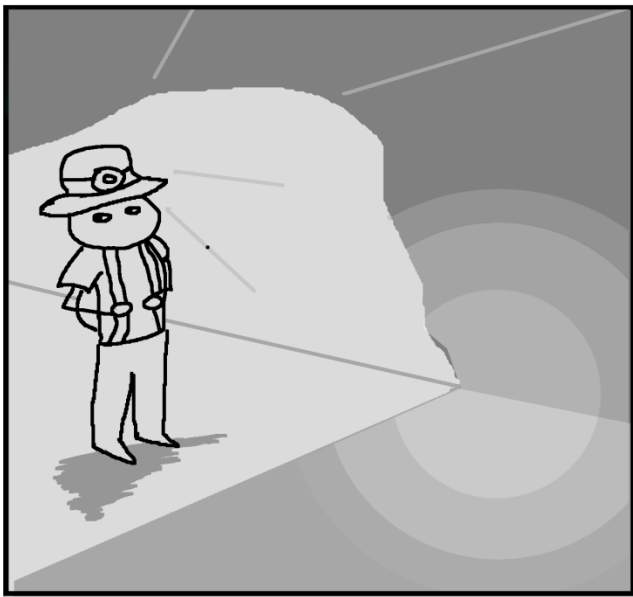

Anything the institute can analyze for data...rock samples and the native insects mostly.

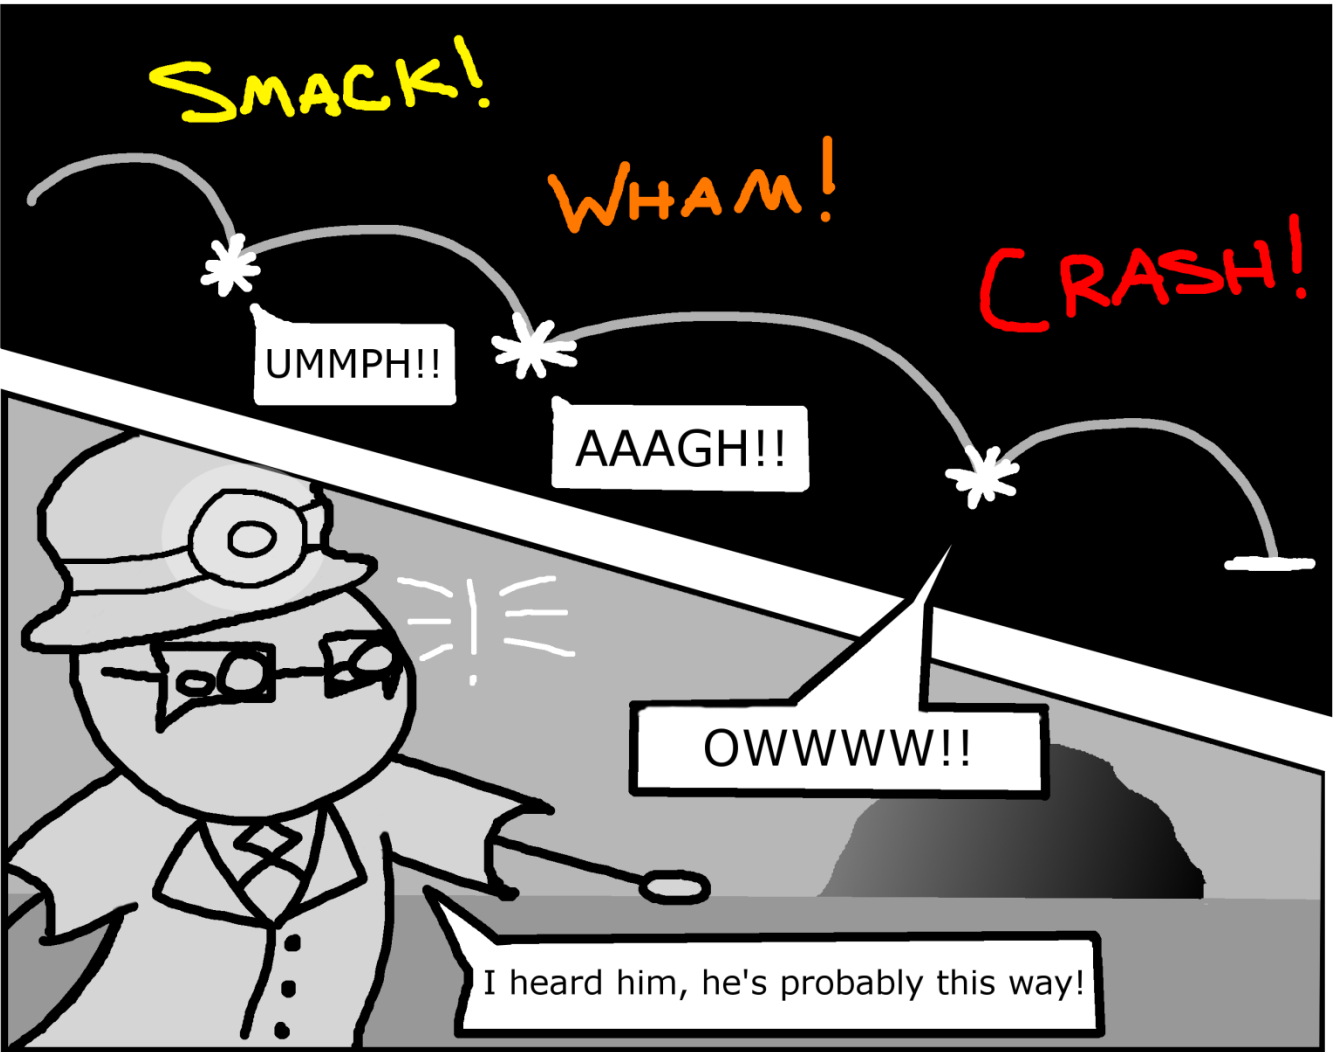

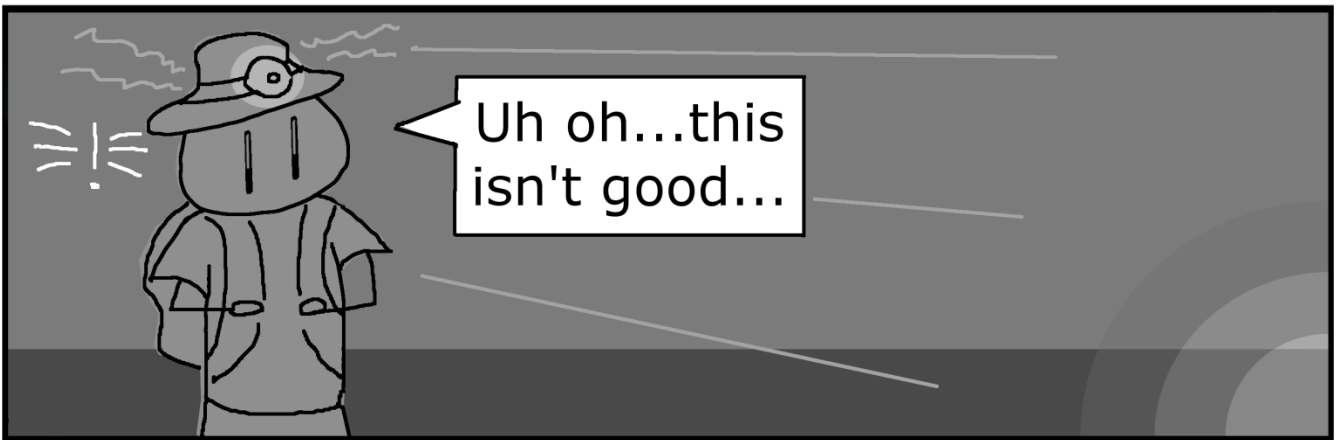

Up ahead is our dig site, don't split up. The tunnel layout is very complex! Grab a hard hat too.

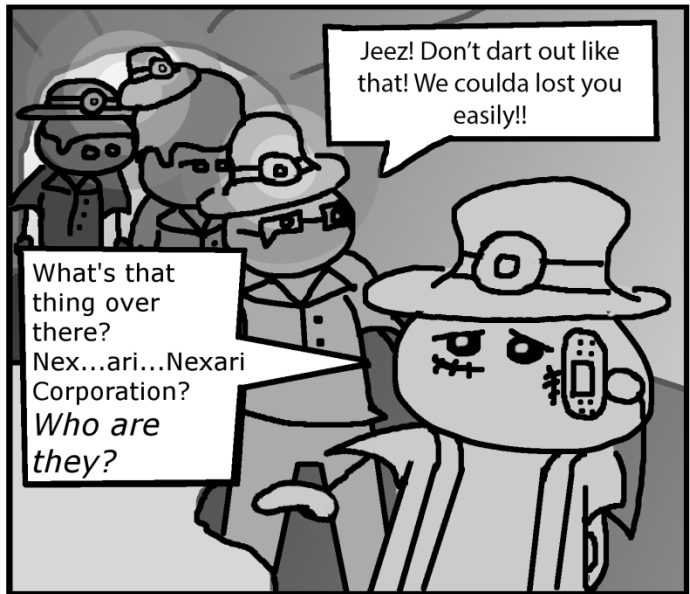

Hmmmm...I wonder what's back there...

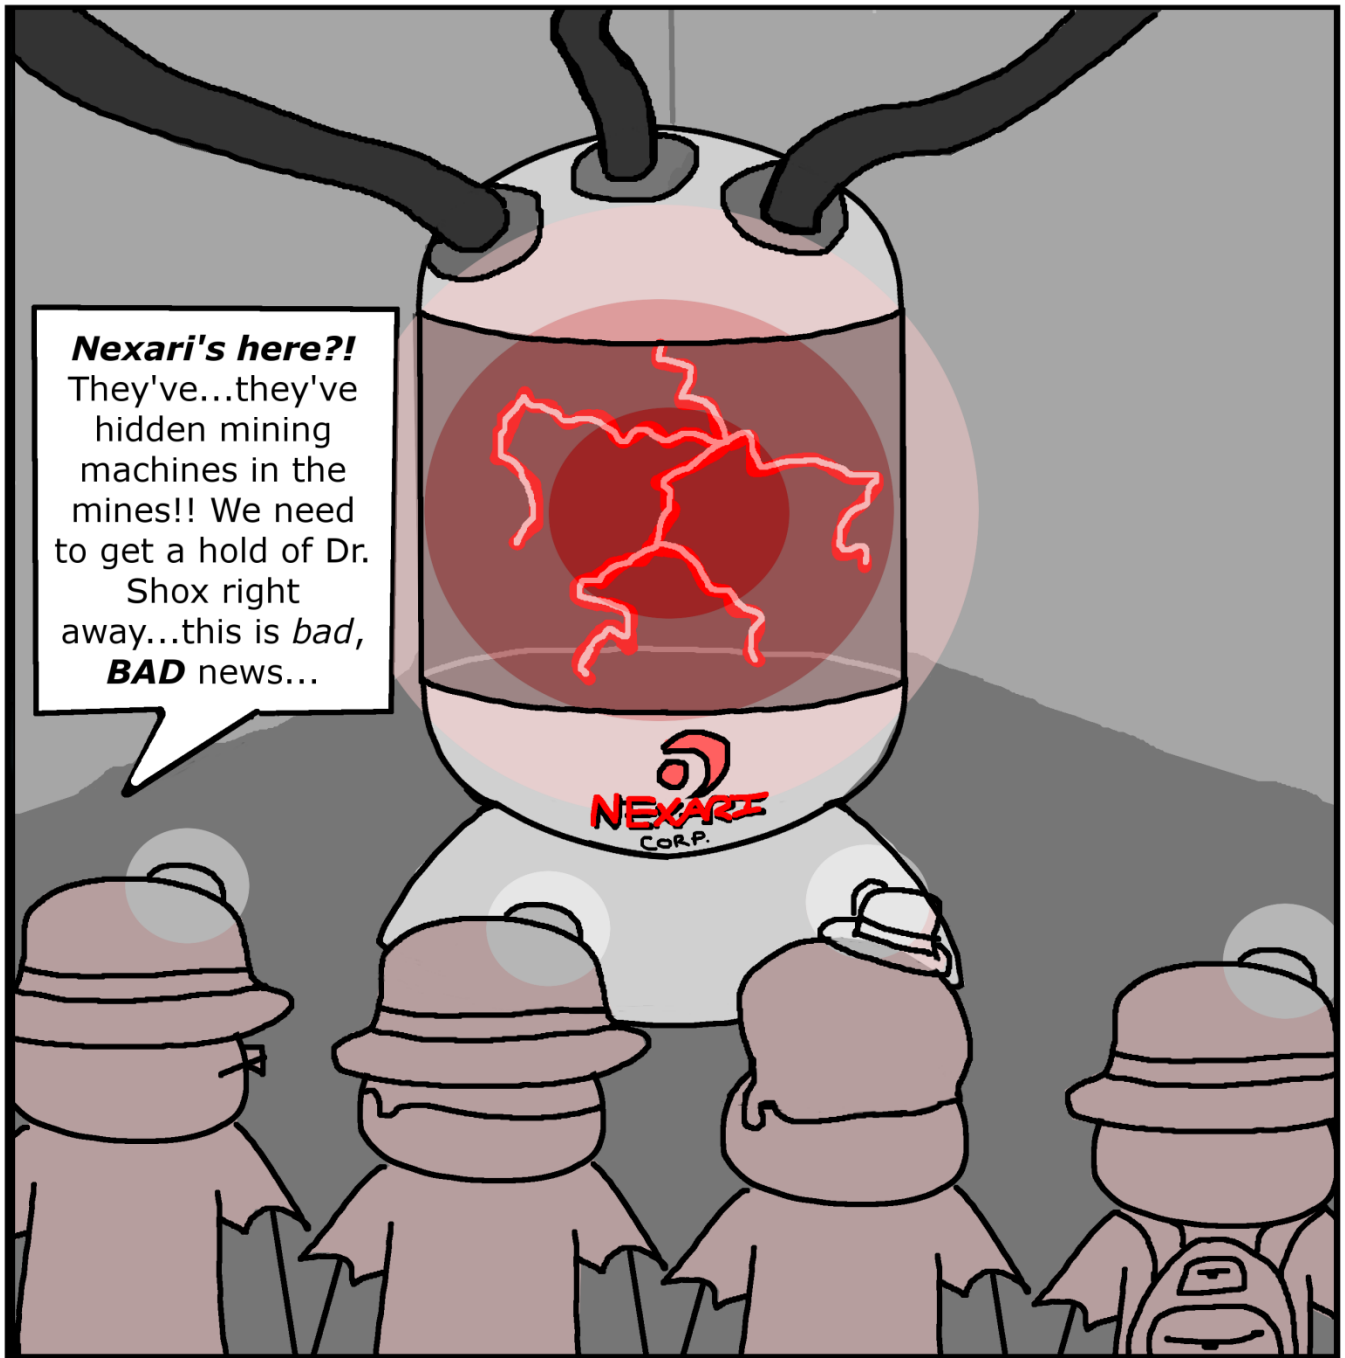

Drake, are you there kid?!

Oww...yeah...

Nexari's here?!
They've...they've hidden mining machines in the mines!! We need to get a hold of Dr. Shox right away...this is *bad*, **BAD** news...

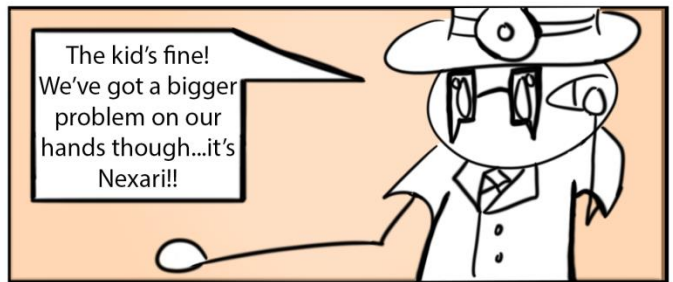

I wonder if Drake's alright...I haven't heard from him in a while...maybe I should check in and...

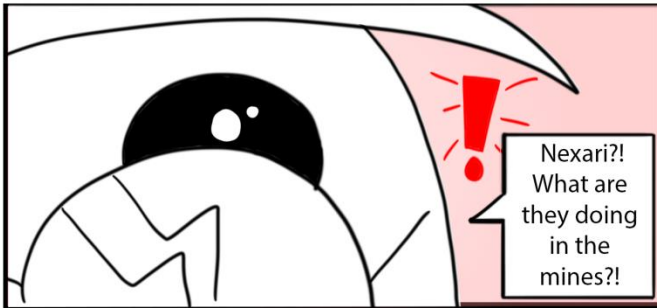

Dr. Shox? Are you there? Come in, Dr. Shox! We've got an emergency on our hands...

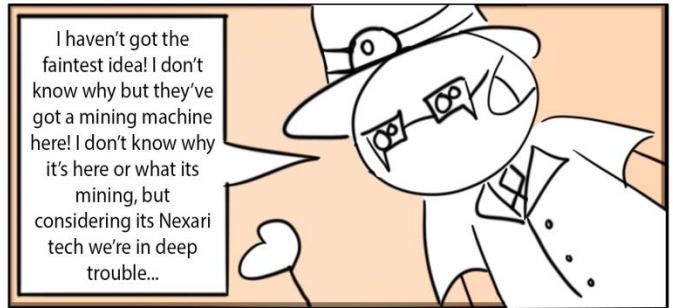

An emergency? What happened?! Maybe I shouldn't have let Drake out there...

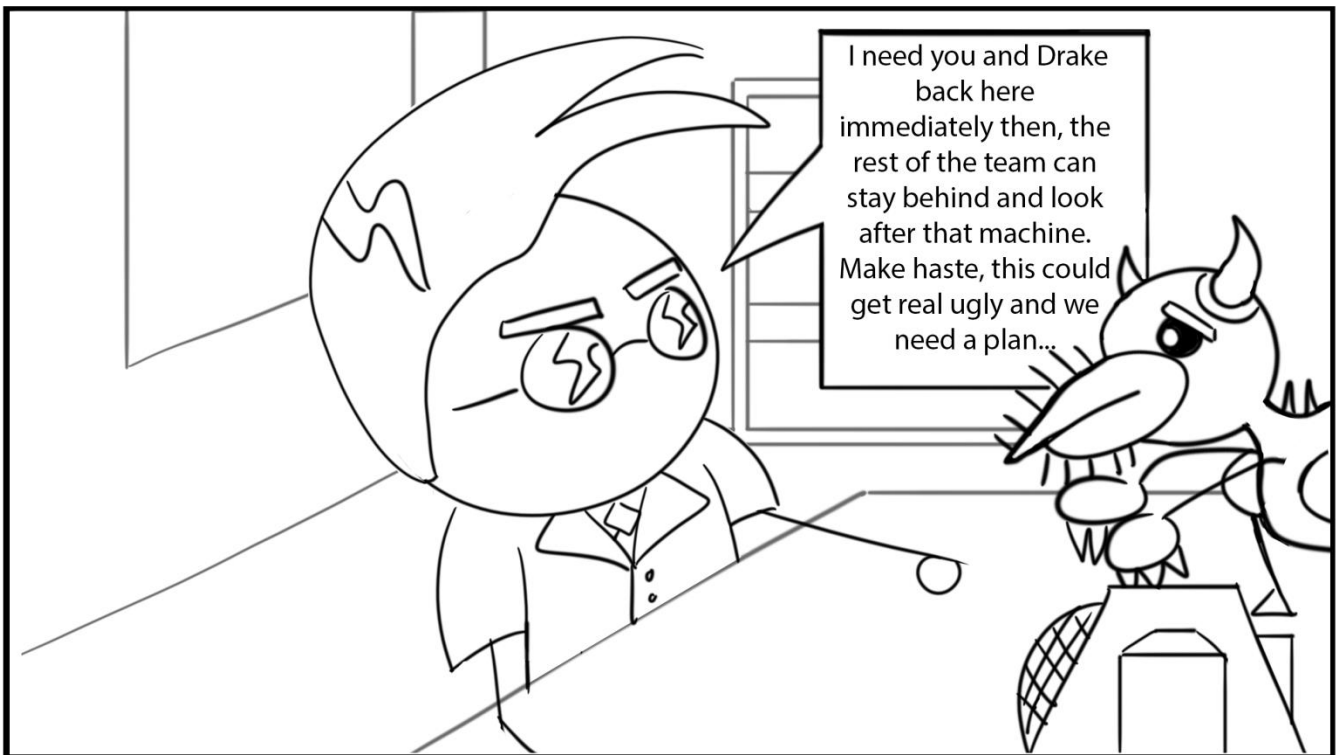

The kid's fine! We've got a bigger problem on our hands though...it's Nexari!!

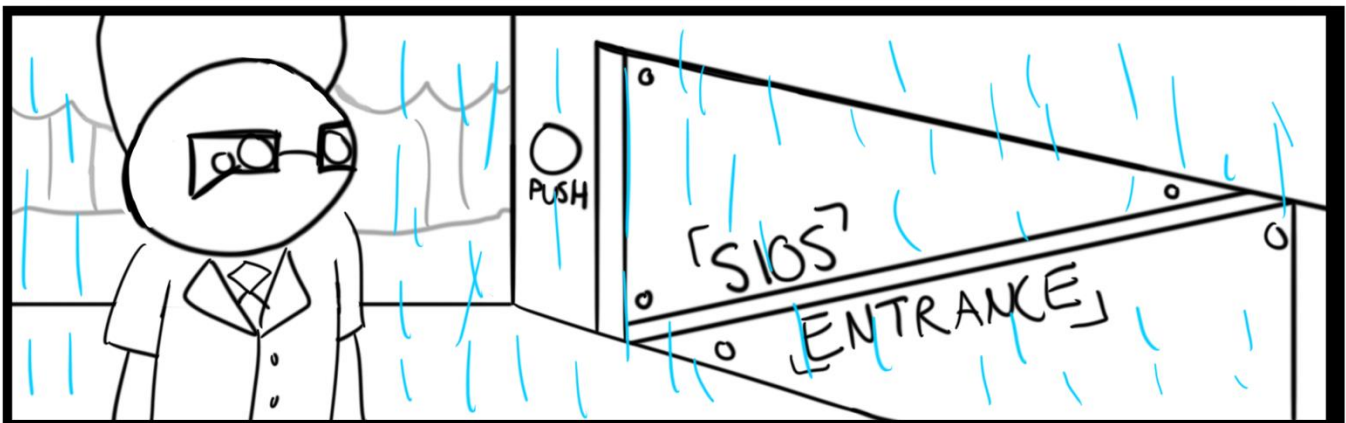

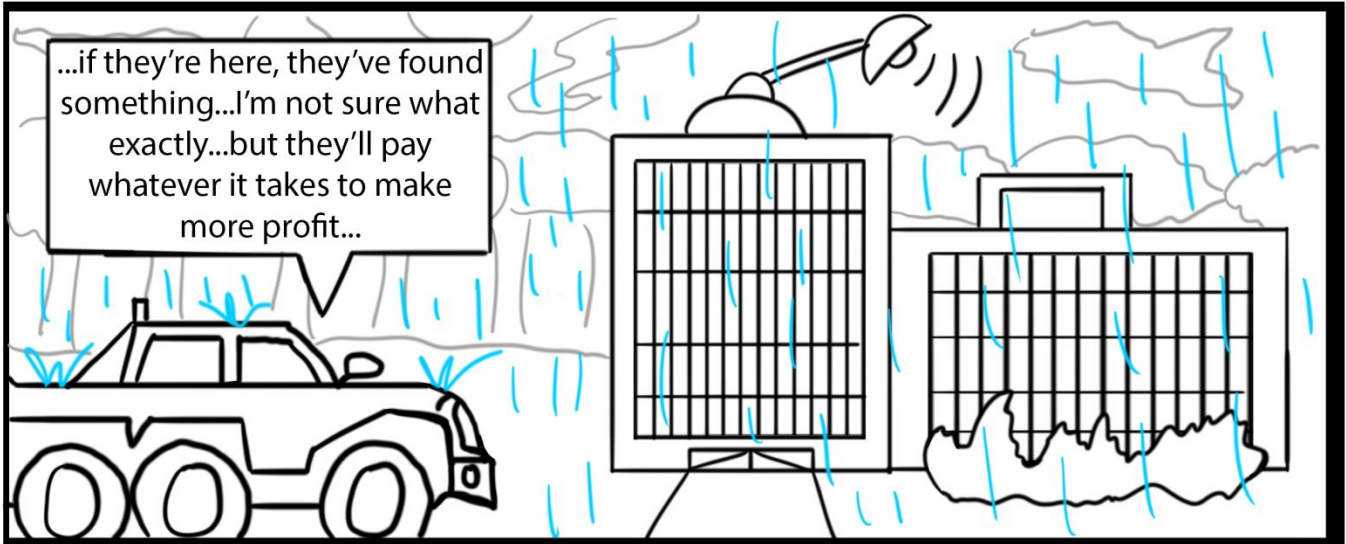

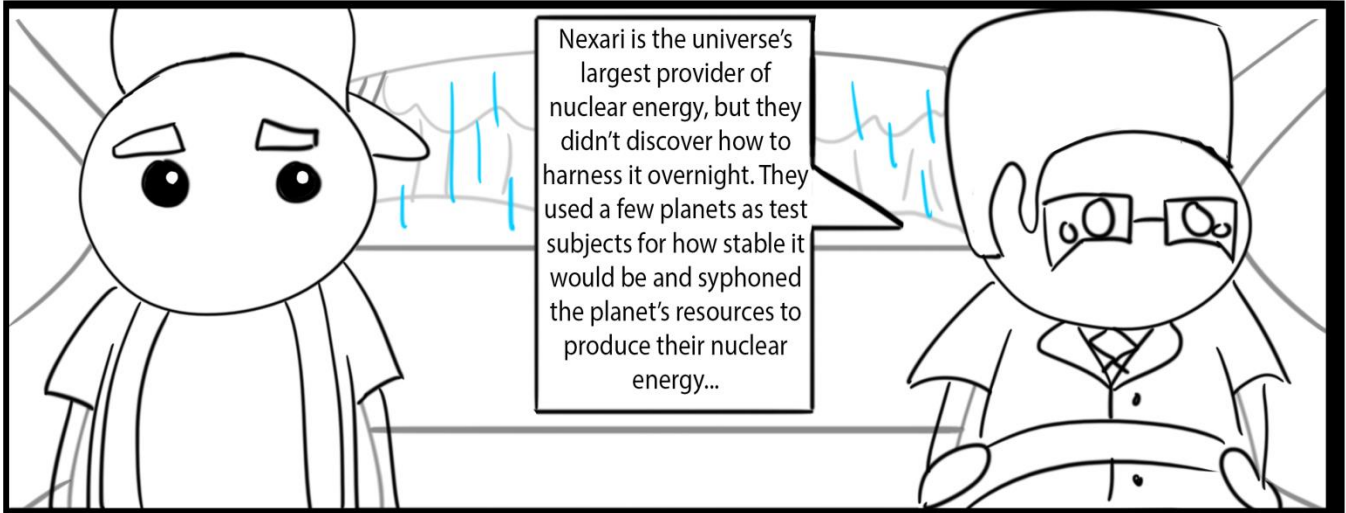

Nexari?! What are they doing in the mines?!

I haven't got the faintest idea! I don't know why but they've got a mining machine here! I don't know why it's here or what its mining, but considering its Nexari tech we're in deep trouble...

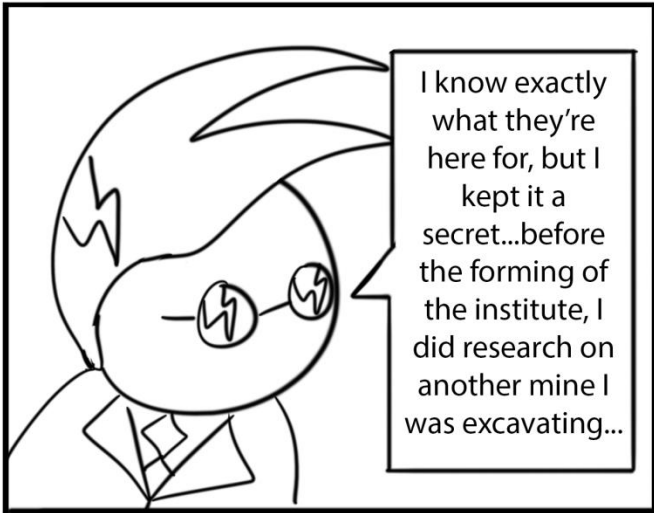

I need you and Drake back here immediately then, the rest of the team can stay behind and look after that machine. Make haste, this could get real ugly and we need a plan...

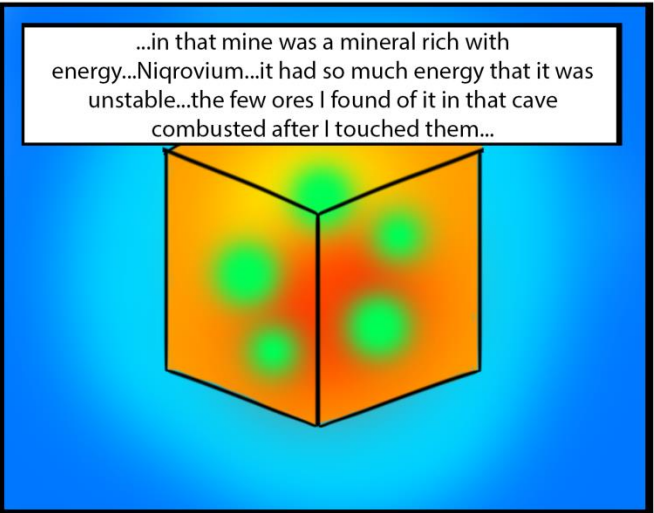

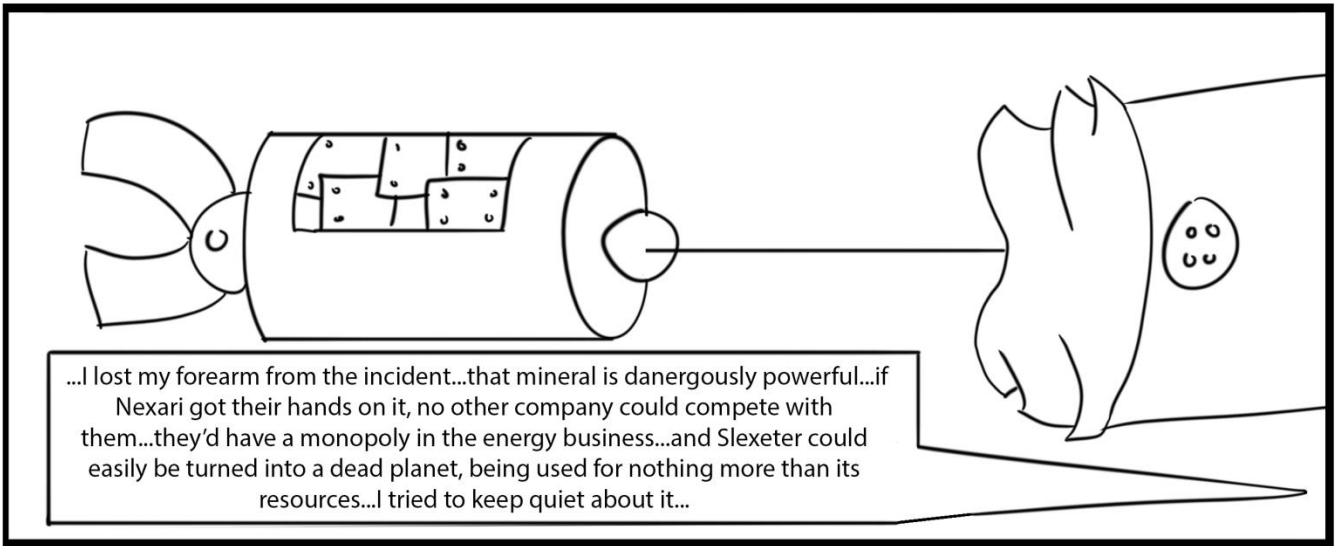

One of my greatest fears I've had since I've lived here is the idea that Nexari might find interest in the planet for their energy. I hoped the day would never rear its ugly head, but today happens to be that day...

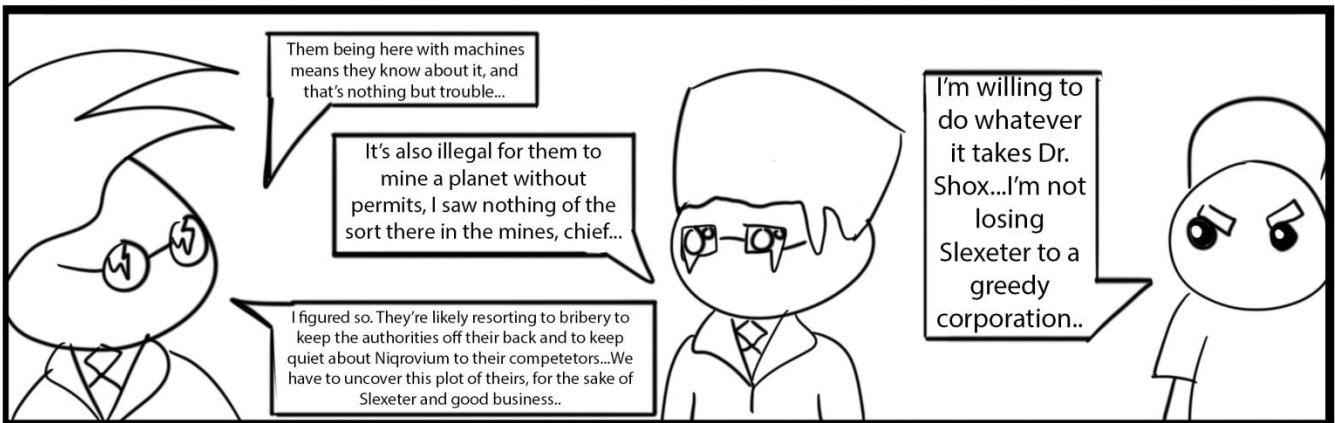

I know exactly what they're here for, but I kept it a secret...before the forming of the institute, I did research on another mine I was excavating...

...in that mine was a mineral rich with energy...Niqrovium...it had so much energy that it was unstable...the few ores I found of it in that cave combusted after I touched them...

...I lost my forearm from the incident...that mineral is danergously powerful...if Nexari got their hands on it, no other company could compete with them...they'd have a monopoly in the energy business...and Slexeter could easily be turned into a dead planet, being used for nothing more than its resources...I tried to keep quiet about it...

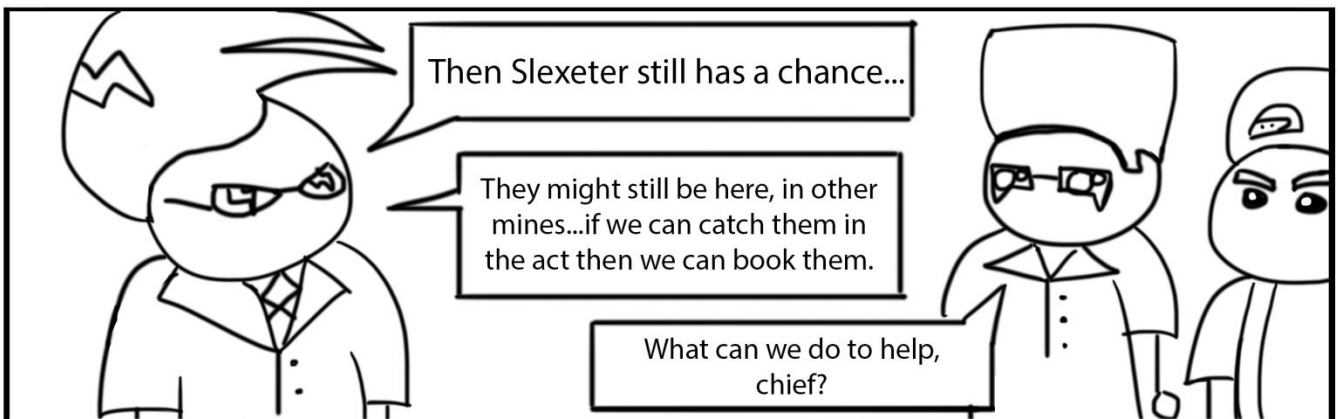

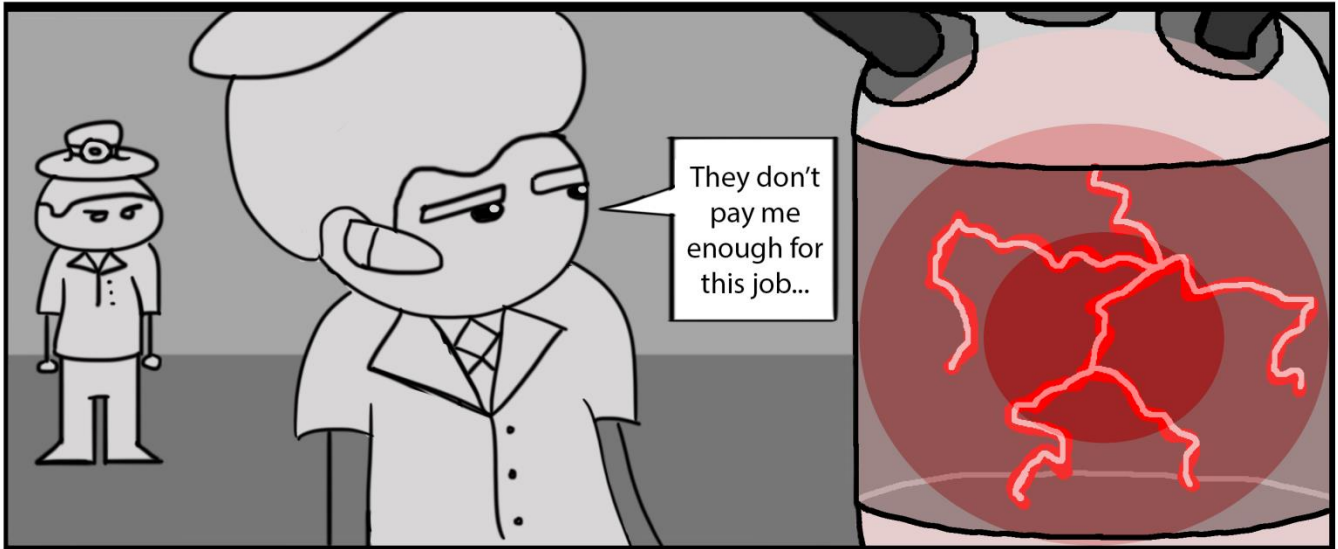

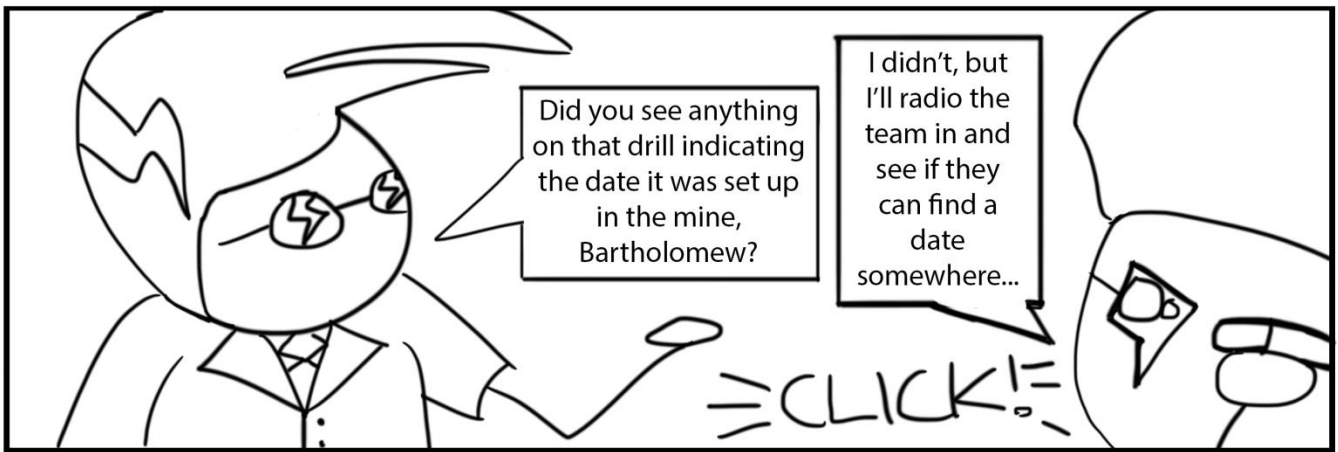

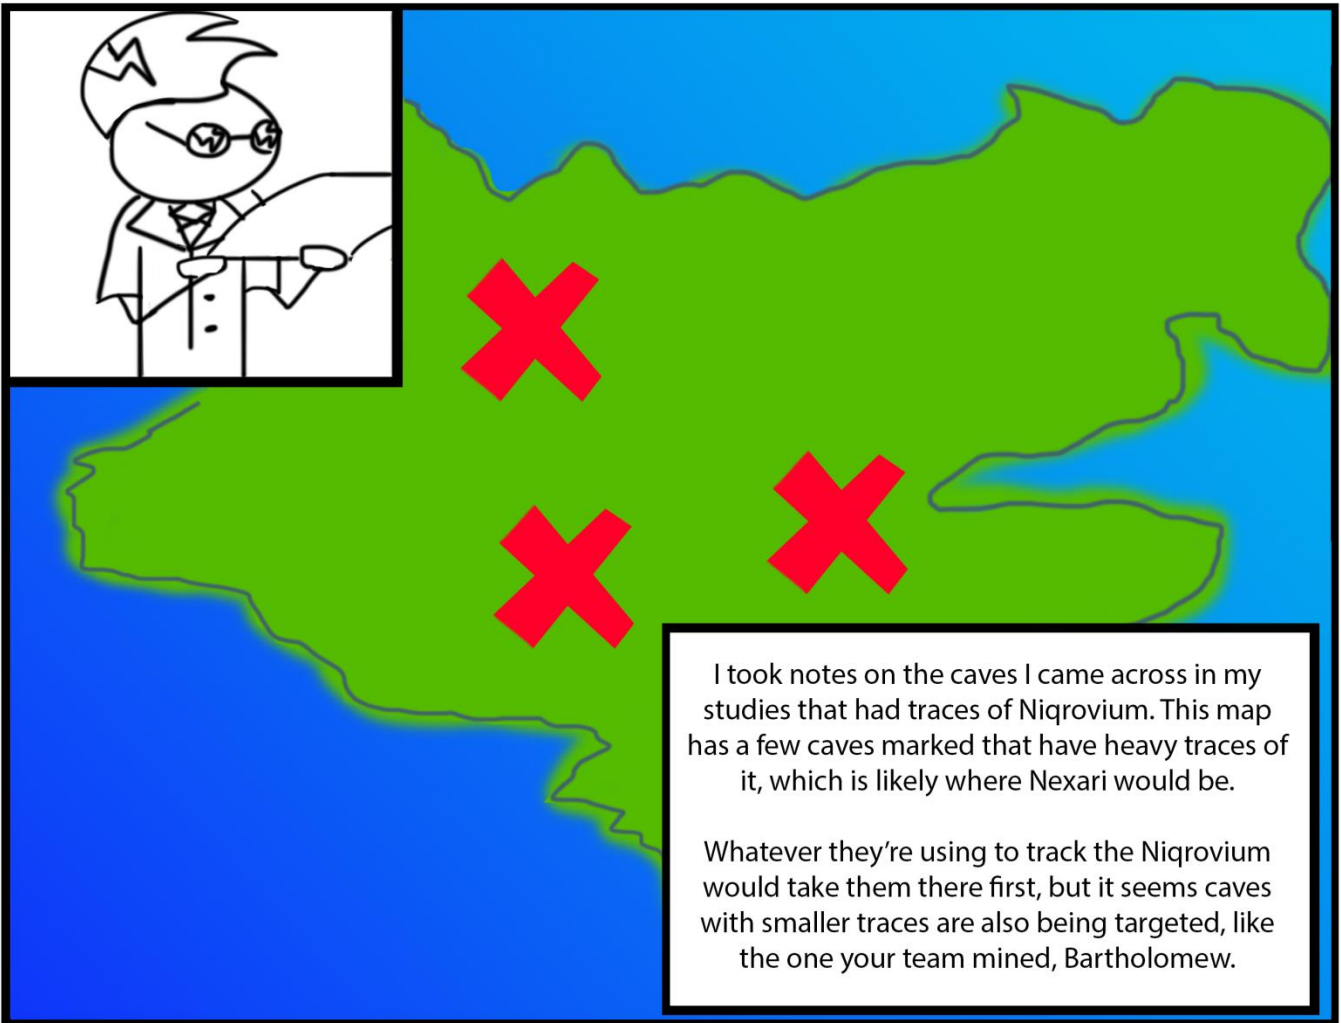

Them being here with machines means they know about it, and that's nothing but trouble...

It's also illegal for them to mine a planet without permits, I saw nothing of the sort there in the mines, chief...

I figured so. They're likely resorting to bribery to keep the authorities off their back and to keep quiet about Niqrovium to their competetors...We have to uncover this plot of theirs, for the sake of Slexeter and good business..

I'm willing to do whatever it takes Dr. Shox...I'm not losing Slexeter to a greedy corporation..

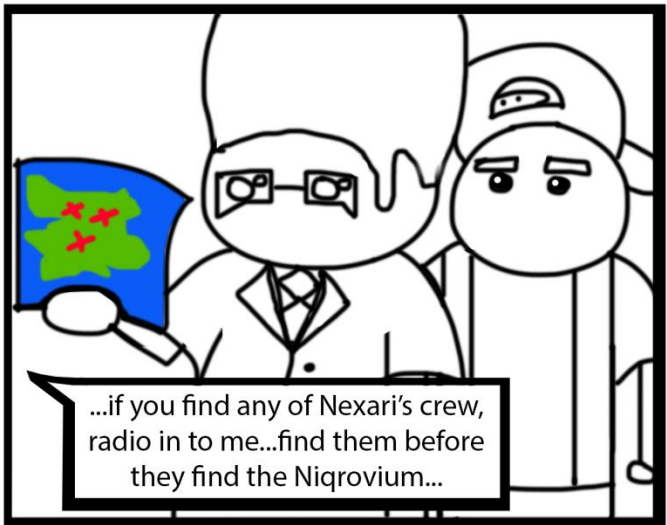

I took notes on the caves I came across in my studies that had traces of Niqrovium. This map has a few caves marked that have heavy traces of it, which is likely where Nexari would be.

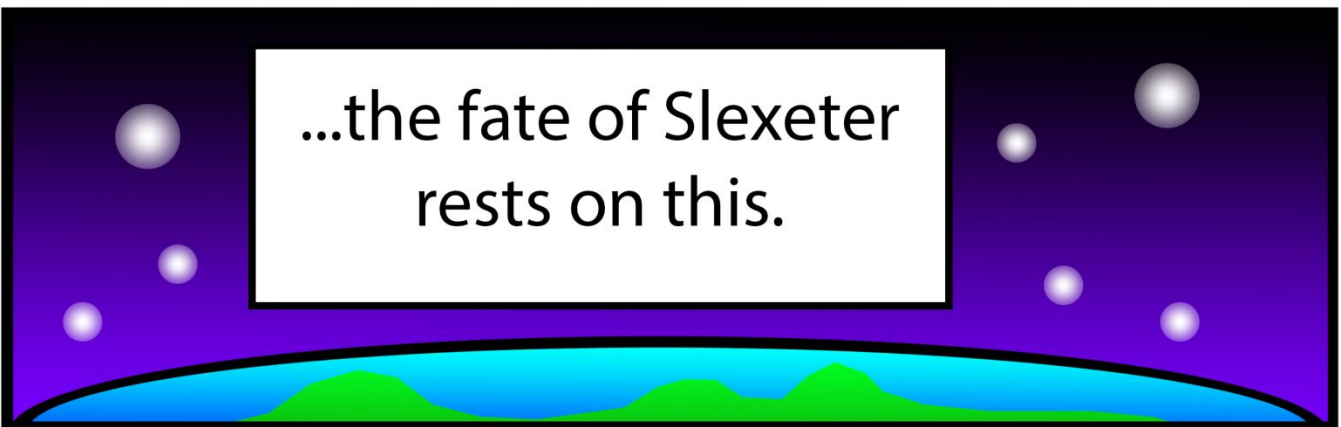

Whatever they're using to track the Niqrovium would take them there first, but it seems caves with smaller traces are also being targeted, like the one your team mined, Bartholomew.

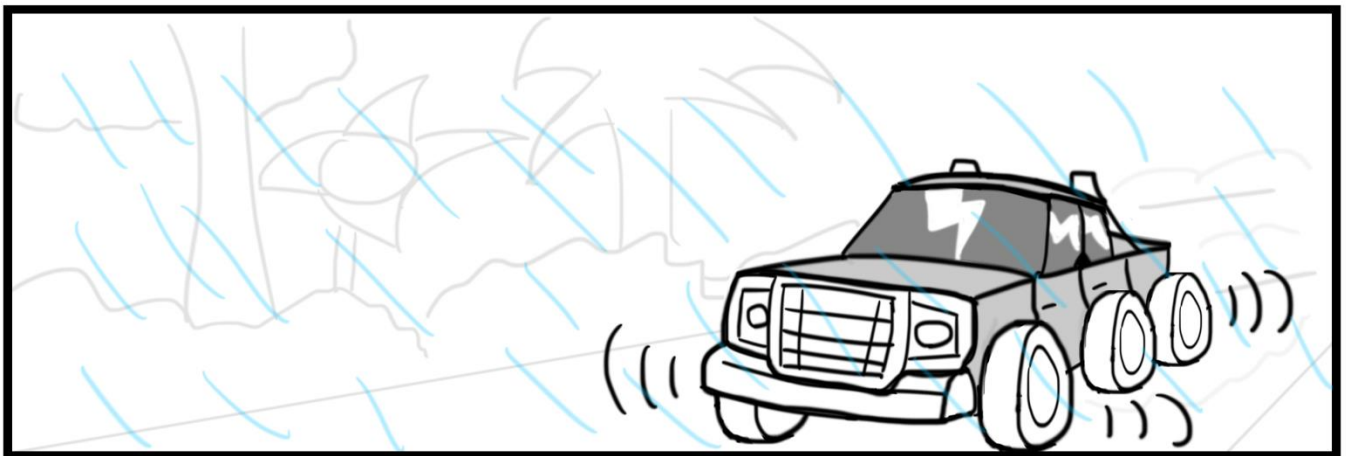

If you want to help, round up your team at their designated mine and investigate these areas together...

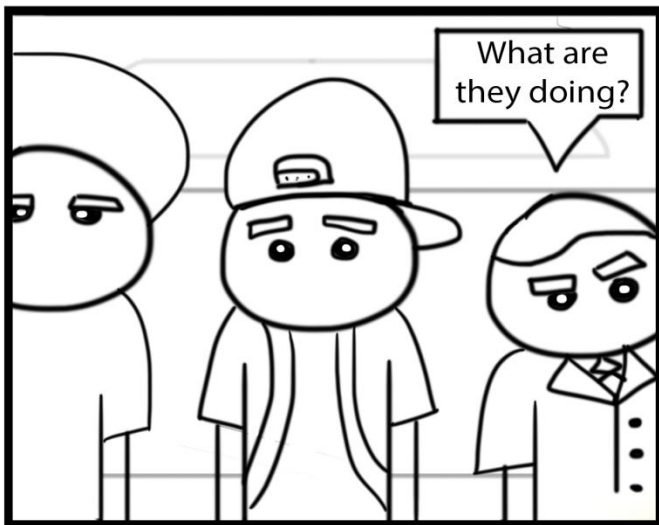

...if you find any of Nexari's crew, radio in to me...find them before they find the Niqrovium...

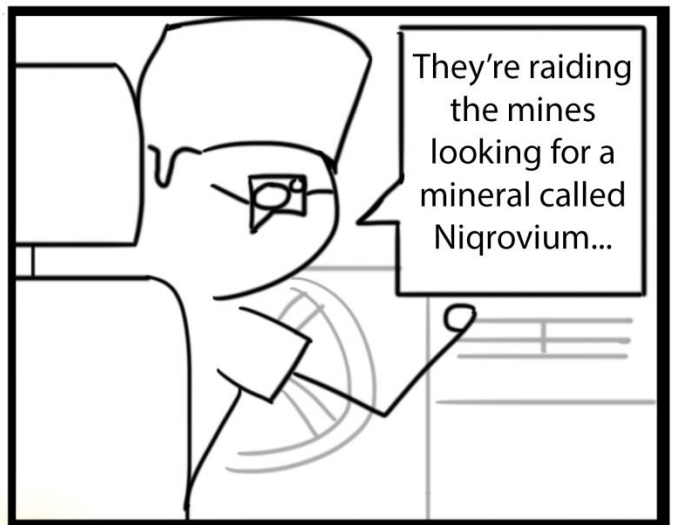

...the fate of Slexeter rests on this.

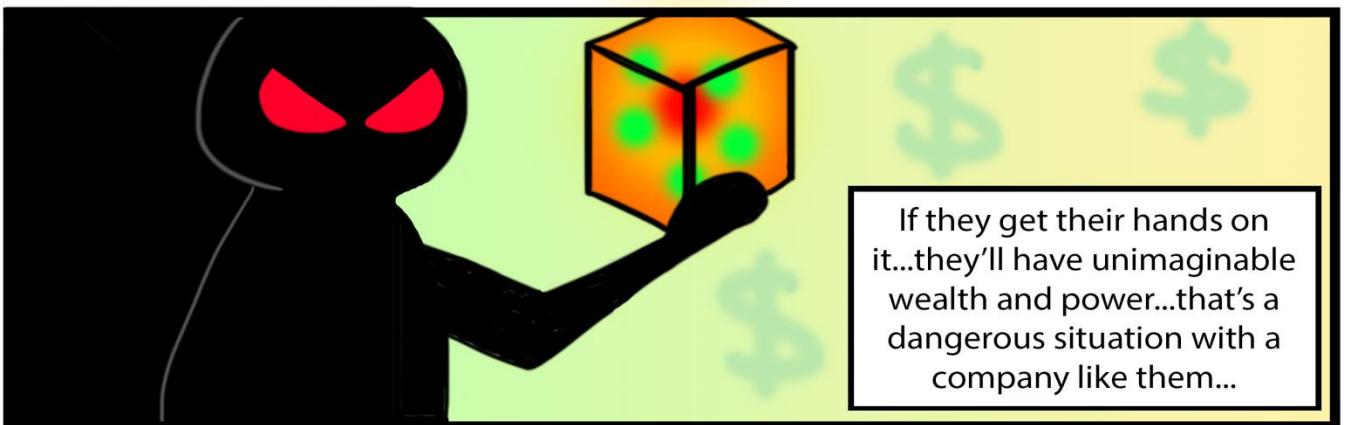

Hop in, guys. We've got to act fast, Nexari's on the loose!

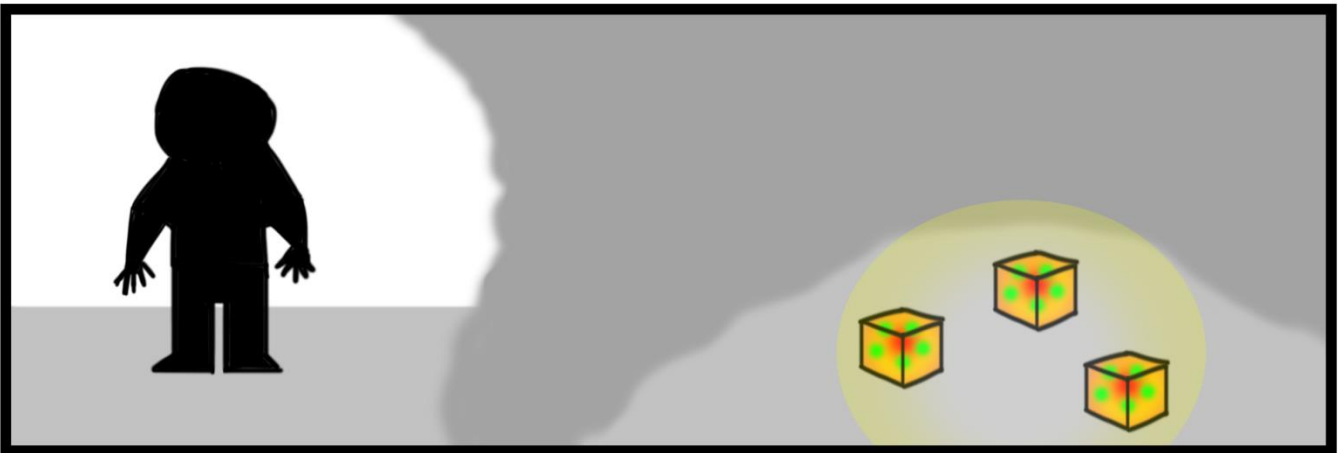

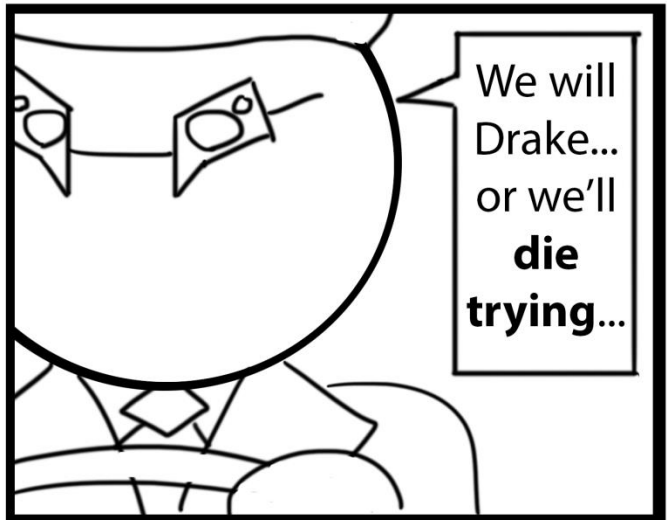

What are they doing?

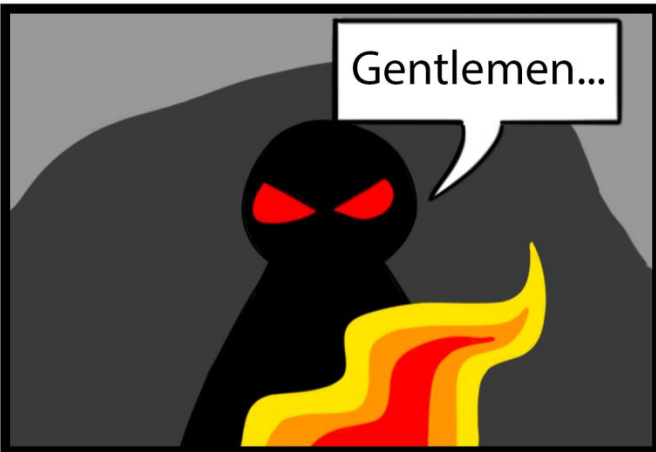

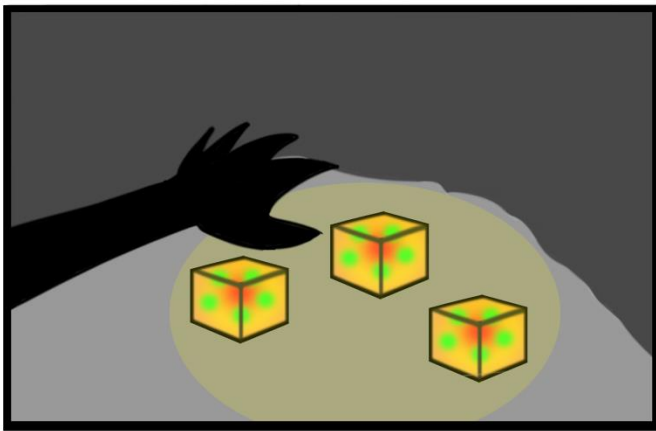

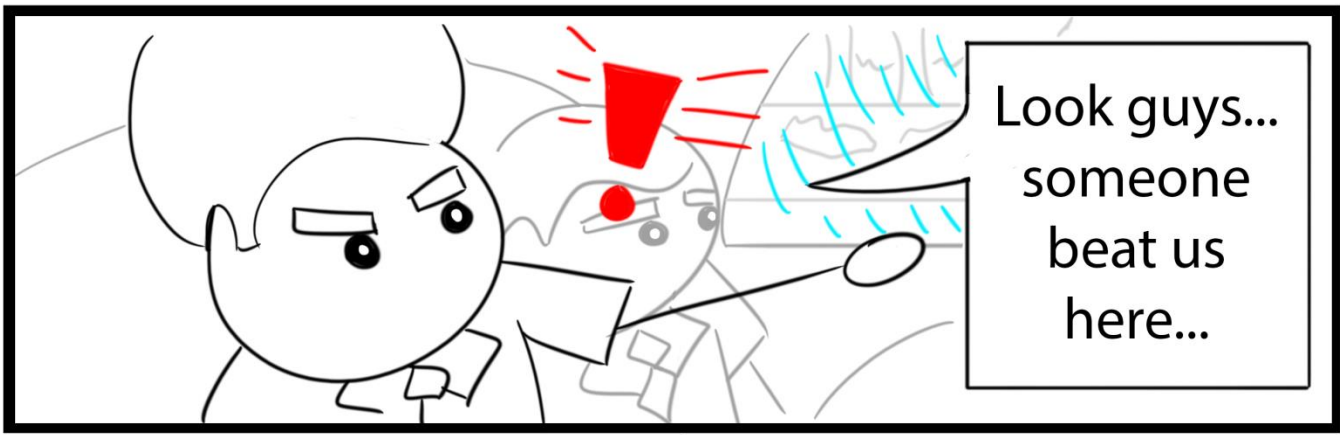

They're raiding the mines looking for a mineral called Nigrovium...

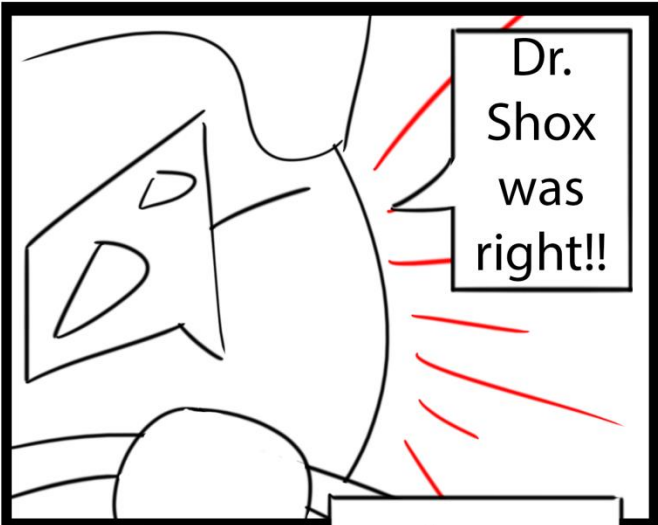

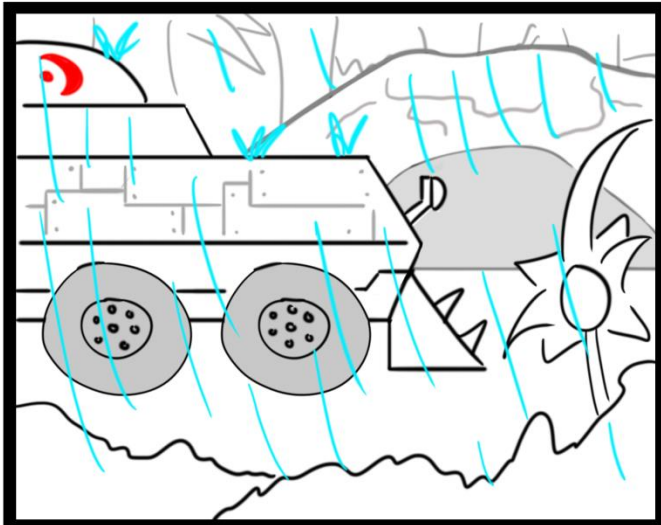

If they get their hands on it...they'll have unimaginable wealth and power...that's a dangerous situation with a company like them...

Look guys...
someone
beat us
here...

Dr.
Shox
was
right!!

WHOA!

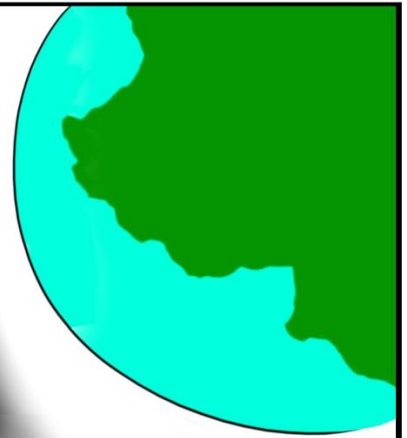

Those greedy lowlifes
went right for the
jackpot! The cave with
the most Nigrovium!!

We've got them
cornered now though...

...time for these
guys to do some
research of their
own...**in prison...**

What if Nexari wins?...
...what will become of Slexeter?...

Perhaps I
should write in
my journal...it
might be a
good idea to
write down
what's going
on for the
future...

SEPTEMBER 29th, 3355

-Bartholomew and his team discovered Nexari machines in the mines.

-Sent them out to catch Nexari before it's too late.

-Slexeter could become nothing more than a Nigrovium mine...

-Too dangerous and unstable, but all Nexari sees in it is profit.

-Greed could become the death of this world and all its life...

-Nexari must be stopped.
